

Swaroop Pradhan

Information Security Manager - GRC & Data Privacy | [LinkedIn](#) | 2swaroopa@gmail.com

Professional Summary

Cybersecurity and Governance, Risk & Compliance (GRC) leader with 20+ years of experience driving information security programs, data privacy initiatives, and regulatory compliance across public sector and global enterprises. Demonstrated success in developing and implementing enterprise AI governance frameworks and organizational Security policies, ensuring responsible AI adoption, risk mitigation, and compliance with emerging regulatory expectations. Expertise in Project Management, GDPR, ISO 27001, Cybersecurity Framework - CIS Controls, NIST and PCI DSS, with hands-on experience conducting privacy assessments, vendor risk assessments, and security control implementations. Skilled at partnering with legal, business, and technology stakeholders to translate complex regulatory requirements into actionable security strategies that protect sensitive data while enabling business objectives.

Certified CSPO, CSM, SAFe Agilist, PRINCE2 Practitioner, ITIL V3 Practitioner.

Trained in AIGP & PMP

WORK EXPERIENCE

PCORI

Information Security Manager

Washington DC, USA

March 2024 – Present

- Lead organization-wide security awareness, campaigns and phishing training programs, improving user awareness and contributing to a measurable reduction in phishing susceptibility.
- Drive enterprise cybersecurity and AI governance initiatives, including developing and implementing the organizational AI Governance policy, establishing AI tool onboarding and risk review processes.
- Partner with Legal and executive leadership (CXO) to review and approve data privacy requirements, DPIAs, and risk acceptance decisions for new technologies, AI tools and data processing activities.
- Manage data privacy and information security reviews, ensuring alignment with organizational policies and regulatory expectations.
- Launching browser extension governance and overseeing software and asset inventory management and data retention programs.
- Conduct vendor and third-party security risk assessments for 30+ vendors annually reviewing security controls, data handling practices, and compliance posture to support procurement and onboarding decisions.
- Developed and authored enterprise policies, including Data Privacy, Data Retention & Destruction, Security Incident Reporting, and AI Governance, ensuring alignment with regulatory and organizational requirements.

TCS

Business Operations, Cybersecurity & ITSM Leadership

USA; Scotland; Australia; India

Sept 2009 - Mar 2023

- Led global IT operations, cybersecurity, GDPR/data privacy, and digital transformation programs for Fortune 500 clients across Media & Publishing, Financial Services, Energy & Utilities, and Retail sectors, managing global cross-functional teams of 20+.
- Directed cybersecurity initiatives including datacenter and application migrations, GDPR compliance programs, and security control implementations, strengthening security posture, regulatory compliance, and business resilience.
- Partnered with DPOs, CTOs, CISOs, Legal, and executive stakeholders to establish governance, risk management, data privacy, and GDPR compliance frameworks aligned with business and regulatory requirements.
- Led enterprise GDPR readiness initiatives, enabling successful regulatory readiness before go-live, by conducting data discovery, data mapping, DPIAs, privacy risk assessments, and compliance gap analyses, identifying systems, websites, applications, and personal data processing activities.
- Acted as Agile Product Owner for SaaS platforms, including OneTrust GRC, owning product backlogs, defining feature roadmaps, prioritizing releases, and coordinating cross-functional delivery teams.

- Implemented ITIL-aligned ITSM processes (Incident, Problem, Change, Capacity, and Service Level Management), driving service stability, operational efficiency, and SLA adherence across multi-vendor ecosystems.
- Led ServiceNow and enterprise tools transformation initiatives, including Service Catalog design, workflow automation, improving operational visibility and executive decision-making.
- Conducted capacity planning and performance optimization initiatives, achieving 99.8% system uptime and a 25% reduction in infrastructure costs.

Logica
IT Consultant

Chennai, India
Jan 2008 – Sept 2009

- Designed, implemented, and managed ITIL-aligned Problem Management processes, driving continuous service improvement and operational stability.
- Analyzed recurring incidents and root causes to reduce service disruptions and improve system reliability.
- Developed operational dashboards and KPI reports to track daily performance, incident trends, and SLA compliance.
- Partnered with cross-functional IT teams to support governance, reporting accuracy, and service quality improvements.

Wipro Technologies
Project Engineer

Chennai, India
Aug 2004 – Jan 2008

- Provided 1st level technical support aligned with ITIL processes for continuous service improvement and operational stability.
- Analyzed recurring incidents and root causes to reduce service disruptions and improve system reliability.
- Developed operational dashboards and KPI reports to track daily performance, incident trends, and SLA compliance.
- Collaborated with cross-functional teams to ensure service delivery aligned with contractual obligations and governance requirements
