

Swaroop Pradhan

Information Security Manager - GRC & Data Privacy | [LinkedIn](#) | 2swaroopa@gmail.com

Professional Summary

Cybersecurity and Governance, Risk & Compliance (GRC) leader with 20+ years of experience driving information security programs, data privacy initiatives, and regulatory compliance across public sector and global enterprises. Demonstrated success in developing and implementing enterprise AI governance frameworks and organizational AI policies, ensuring responsible AI adoption, risk mitigation, and compliance with emerging regulatory expectations. Expertise in GDPR, ISO 27001, NIST Cybersecurity Framework, CIS Controls, and PCI DSS, with hands-on experience conducting Data Protection Impact Assessments (DPIAs), vendor risk assessments, and security control implementations. Skilled at partnering with legal, business, and technology stakeholders to translate complex regulatory requirements into actionable security strategies that protect sensitive data while enabling business objectives.

WORK EXPERIENCE

PCORI

Information Security Manager

Washington DC, USA

March 2024 – Present

- Lead organization-wide security awareness, campaigns and phishing training programs, improving user awareness and contributing to a measurable reduction in phishing susceptibility.
- Drive enterprise cybersecurity and AI governance initiatives, including developing and implementing the organizational AI Governance policy, establishing AI tool onboarding and risk review processes.
- Partner with Legal and executive leadership (CXO) to review and approve data privacy requirements, DPIAs, and risk acceptance decisions for new technologies, AI tools and data processing activities.
- Manage data privacy and information security reviews, ensuring alignment with organizational policies and regulatory expectations.
- Launching browser extension governance and overseeing software and asset inventory management and data retention programs.
- Conduct vendor and third-party security risk assessments for 30+ vendors annually reviewing security controls, data handling practices, and compliance posture to support procurement and onboarding decisions.
- Developed and authored enterprise policies, including Data Privacy, Data Retention & Destruction, Security Incident Reporting, and AI Governance, ensuring alignment with regulatory and organizational requirements.

TCS

Business Operations, Transformation & ITSM Leadership

Hoboken, NJ; Glasgow, Scotland; Melbourne, Australia; Kolkata, India

Sept 2009 - Mar 2023

- Led global IT operations and digital transformation programs for Fortune 500 clients across Media & publishing, financial services, Energy & Utilities, and retail sectors, managing teams of 20+ across multiple geographies
- Directed cybersecurity initiatives including datacenter and application migrations, improving system availability, security posture, and regulatory compliance.
- Partnered with global stakeholders and senior leadership to ensure governance, risk management, data privacy and compliance, aligning IT services with business and regulatory requirements.
- Acted as Agile Product Owner for SaaS platforms, owning product backlogs, defining feature roadmaps, prioritizing releases, and coordinating cross-functional delivery teams.
- Implemented ITIL-aligned ITSM processes (Incident, Problem, Change, Capacity Management), driving service stability, operational efficiency, and SLA adherence across multi-vendor ecosystems.
- Led ServiceNow deployments and enhancements, including Service Catalog design and operational/compliance dashboards, enabling leadership-level reporting and decision-making.
- Designed and standardized business processes and operating models, optimizing workflows to support scale, cost efficiency, and continuous service improvement.
- Conducted capacity planning and performance optimization initiatives, achieving 99.8% system uptime and 25% reduction in infrastructure costs
